▶ 01 INTRODUCTION

Context. The computer room is a shared engineering facility equipped with desktop workstations, networking hardware, peripherals, and audiovisual equipment. It is used daily by students and staff for programming, simulation, CAD, and group projects.

Purpose. This protocol establishes the mandatory safety rules and emergency procedures that all users **must** follow to prevent electrical, ergonomic, fire-related, and ESD-related incidents. Compliance protects users, equipment, and data integrity.

~/safety/02_hazards.log

9 entries

▶ 02 IDENTIFIED HAZARDS

[HZ-01]	Electric shock	ELECTRICAL	HIGH
[HZ-02]	Equipment fire	FIRE	HIGH
[HZ-03]	Overloaded sockets	ELECTRICAL	MEDIUM
[HZ-04]	Trip hazards (loose cables)	MECHANICAL	MEDIUM
[HZ-05]	Electrostatic discharge	ESD	MEDIUM
[HZ-06]	Eye strain & fatigue	ERGONOMIC	LOW
[HZ-07]	Poor posture / RSI	ERGONOMIC	LOW
[HZ-08]	Blocked ventilation	ENVIRONMENTAL	LOW
[HZ-09]	Cleaning solvents (IPA)	CHEMICAL	LOW

8 rules

▶ 03 GENERAL RULES

\$

MUST

sign in at the access terminal before using any workstation.

\$

MUST NOT

bring food, drinks, or liquids near the equipment.

\$

MUST

keep walkways and emergency exits clear at all times.

\$

MUST NOT

open, disassemble, or modify any hardware without authorisation.

\$

SHOULD

report any damaged cable, socket, or device to the lab supervisor immediately.

\$

MUST

save your work regularly and log out before leaving the workstation.

\$

MUST NOT

connect personal high-power devices (heaters, kettles) to lab sockets.

\$

SHOULD

take a short break every 50–60 minutes to reduce eye strain.

~/safety/04_procedures.sh

3 phases

▶ 04 OPERATING PROCEDURES

▶ BEFORE_USE()

01

Inspect the workstation: check monitor, keyboard, mouse, and power cables for visible damage.

02

Verify chair height and screen distance (~50–70 cm from eyes, top edge at eye level).

03

Ensure cables are routed under the desk and do not cross walkways.

04

Power on the computer using the dedicated button. Do not switch the wall socket on and off repeatedly.

⚡ DURING_USE()

01

Keep liquids and food outside the room.

02

Do not block the ventilation grilles of the CPU tower or the monitor.

03

If you smell burning plastic, see smoke, or notice abnormal heat, stop and notify the supervisor.

04

When handling internal components, you must wear an anti-static wristband to prevent ESD damage.

05

Maintain correct posture: feet flat, back supported, wrists straight while typing.

■ AFTER_USE()

01

Close all applications and save your files to your assigned storage location.

02

Log out of the user session. Do not shut down the computer unless instructed.

03

Push the chair under the desk and leave the workstation clean and tidy.

04

Report any incident, malfunction, or near-miss in the lab logbook before leaving.

! STDERR :: EMERGENCY PROCEDURES · CALL 112

▶ 05 EMERGENCY PROCEDURES

FIRE OR SMOKE

1. Activate the nearest fire alarm.

2. If the fire is small and electrical, use the CO₂ extinguisher.

Never use water.

3. Disconnect the main power switch if it is safe.

4. Evacuate using the marked route. Do not use lifts.

ELECTRIC SHOCK

1. Do not touch the affected person directly.

2. Cut the power at the main switch.

3. Call emergency services: 112.

4. Notify the supervisor and remain at the scene.

POWER FAILURE

1. Remain calm and stay seated until lights return or evacuation begins.

2. Do not attempt to restart equipment.

3. Follow supervisor instructions.

EVACUATION

1. Leave personal belongings behind.

2. Follow the green exit signs to the assembly point.

3. Do not re-enter the room until authorised personnel confirm it is safe.

~/safety/06_ppe.conf6 items

▶ 06 PPE REQUIREMENTS

anti_static_wristband

When opening any computer case or handling internal components, RAM, or expansion cards.

MAND

closed_toe_footwear

At all times inside the lab to prevent injuries from falling objects or cable trips.

MAND

nitrile_gloves

When using isopropyl alcohol or cleaning solvents on equipment.

MAND

blue_light_glasses

For prolonged screen sessions exceeding two hours.

REC

ergonomic_wrist_rest

For intensive typing or CAD work sessions to reduce RSI risk.

REC

hair_tied_back

When working near cooling fans or open equipment.
